---

## Experience

### Greenphire / Technical Analyst

May 2021 - Present, King of Prussia, PA

Investigate and implement solutions to JIRA support tickets using Python, Django, Git and Linux.

Identify and report defects found in the codebase.

Write reusable/utility scripts to integrate as internal business services in Python, Django and Angular.

### M-Tac Trucking Compliance LLC / Web Developer

July 2020 - May 2021, Glassboro, NJ

Maintain UI/UX design of the company website using HTML5, CSS3, React and Bootstrap.

---

## Projects

### Slow Loris API

MERN stack and REST API

A minimal API that retrieves information about a species of nocturnal primates known as slow lorises.

Fetches data stored in a mongoDB database using mongoose and expressJS to send various HTTP GET endpoints such as a unique id, common name, habitat and many more.
